Fund fact sheet date: 31 January 2021

TM home investor fund is the UK's first Financial Conduct Authority regulated residential Property Authorised Investment Fund (PAIF)

This factsheet is for information only. It is not designed to provide advice on the suitability of an investment for your personal financial situation. If you have any questions regarding the information included in this factsheet, you are recommended to speak to a financial adviser.

Investment Objective

The Fund invests in private rented sector housing across the mainland UK regions and aims to capture UK house price growth plus provide an element of income return. The property investment manager, Hearthstone Asset Management Limited, uses quantitative asset allocation methods and qualitative regional stock selection to build a portfolio of assets reflecting the distribution of UK mainland housing stock. Properties are let under assured shorthold tenancies (AST's) and corporate lets. Investment returns comprise capital growth and rental income. The e.surv House Price Index (previously known as LSL Acadata) is used for the purpose of performance comparisons.

Property Investment Manager's commentary

On January 4th the Prime Minister announced a national lockdown but unlike during the first lockdown in Spring 2020, the housing market remains open and housebuilders, estate agents, valuers and removal companies can carry on their activities following strict Covid-19 protocols.

The Fund recorded a positive return in January. Income resilience of the residential sector was demonstrated again with rent collection at 99% in January. We are also seeing occupancy in the portfolio hold steady at percentages in the upper 90's, and arrears continue to fall as tenants pay down their debt through agreed payment plans and increased financial optimism.

Property valuations increased by 0.33% at property level, once again being driven by houses within commuting distance of cities. It is important to note that the Fund's capital performance is driven by valuations of the properties it holds - not by reference to any house price index. As much of the recent transaction volumes impacting various house price indices has occurred at the premium end of the housing market, and less so in the 'mid-market' stock held by the Fund, we are currently seeing a certain disconnect between mainstream house prices and reported indices. Furthermore, the TM home investor fund relies on direct comparable sales evidence for valuation adjustment. The significant strain on various participants in housing transactions is still leading to some delays for the Standing Independent Valuer CBRE who can only adjust values in the portfolio once the sale of comparable properties have exchanged.

The Fund completed on the sale of one property in the month as part of our ongoing asset management programme, and we have now started conversations with a small number of housebuilders in relation to a potential acquisition in the North West or Yorkshire and hope to be able to update further over the coming quarter.
