

Class F Shares - Institutional Net - 31 October 2022

TM home investor fund is the UK's first Financial Conduct Authority regulated residential Property Authorised Investment Fund (PAIF).

This factsheet is for information only. It is not designed to provide advice on the suitability of an investment for your personal financial situation. Investors should read the Key Investor Information Document or Prospectus which are available on www.homeinvestor.fund or by contacting info@hearthstone.co.uk.

Investment Objective Summary

The Fund invests in private rented sector housing across mainland UK regions and aims to capture UK house price growth and provide an element of income return. The property investment manager, Hearthstone Asset Management Limited, uses quantitative asset allocation and qualitative regional stock selection to build a portfolio of assets reflecting the distribution of UK mainland housing stock which are let under assured shorthold tenancies (AST's) and corporate lets. Investment returns comprise capital growth and rental income. The e.surv Acadata House Price Index is used for performance comparisons only. It is not a target benchmark and the fund is not constrained by it. This index has been chosen as a comparator benchmark as it is based upon actual sales completed and is mix-adjusted.

Please see the Key Investor Information Document or Prospectus for the full Investment Objective and Policy wording, and on the choice of performance comparator.

Property Investment Manager's commentary

There was a small downward valuation on the portfolio this month which was due in the main to a reduction in values on the Spectrum apartments (Manchester) following a cash-sale of a comparable property on the site. Until now, there had been no transaction data on which to base valuations for apartments in this location, but this transaction caused the Standing Independent Valuer to reduce the 17 Spectrum apartments by a total of £160,000. The Spectrum flats continue to let very well at a gross yield of 5.9%. There was no net change in valuation on the rest of the Fund's property portfolio in October. The downward valuation was partially offset by continued strong income. There are no signs of slowing demand in the rental sector, and the continued shortage of good quality properties to rent means the Fund's properties are letting very quickly and rents continue to rise. We maintain our prudent approach to rent reviews for existing tenants in light of cost-of-living pressures. Re-lets of vacant properties are priced at prevailing market rates. Average annual rental growth was 4.9% at the end of October, this being 3.4% on reviews of existing tenancies and 8.6% on relets of vacated properties. By way of comparison, the latest ONS Rental Index denotes 3.6% annual increase in UK rents to September. Rent collection remains high at 98% whilst arrears and voids remain low across the portfolio.

Despite the slowdown in demand caused by recent increases in mortgage rates, supply of available properties for sale has also reduced significantly and this has the effect of supporting prices. Whilst the Bank of England increased the base interest rate to 3% on 3rd November, financial markets are now predicting rates will peak at a lower level than was expected immediately after the 23rd September 'mini-budget' and those expectations are already feeding through to lower rates on popular 2- and 5-year fixed rate mortgages. Whilst the outlook for house prices remains uncertain for 2023 the portfolio benefits from broad regional diversification as well as a mix of houses and flats and, as previously indicated, the private rented sector did not see the same levels of capital appreciation over the past 18 months as larger, owner-occupied properties during the post pandemic boom.

* The Standing Independent Valuer (SIV) attached a material valuation uncertainty clause to the Spectrum flats in Manchester in April 2021 following a failed EWS1 (external wall safety) assessment. These assessments were introduced by the government to improve fire safety of high-rise buildings including external cladding. As there is currently no clarity as to potential cost and timing of any remedial works, or whether this may require funding from leaseholders, the clause remains in place. Consequently, the SIV states less certainty and a higher degree of caution should be attached to its valuation of these units, and that it may take longer than the usual 3-6 month marketing period should a decision be made to sell them individually. All residents are aware of the situation and additional fire safety measures have been implemented. The 17 flats held by the fund, of which 12 are in a building below 18 metres, are part of a larger development of c. 600 apartments. Since a Material Valuation Uncertainty clause has been attached to these properties, the 30th June 2022 financial statements were qualified.
